It is generally conceded by boatmen, that should the gorge be carried away by a sunden rise, all beats at the levee and between here and Caron at the levee and between here and Caron-delet will be in more or less peril. The Ames, however, is out on the ways, high and dry, and it will probably require a handsome sum to induce her to descend from her present secure position to the more dangerous elements below. The ateam tugs seem to be the most effective ice-breaking crafts we have, and have proved indispensable thus far during the present cold winter in keeping open com-munication between this and the oppo-

munication between this and the oppo-site shore. That the ice should be broken up in the barbor as soon as it is practical SOPELAND'S ASTHMA CURE.
